Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Oath/Declaration

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

It does not state that the person making the oath or declaration acknowledges the duty to disclose to the Office all information known to the person to be material to **patentability** as defined in 37 CFR § 1.56.

Applicants' declaration dated 24 April 2004 at page 3, item 9, refers to information "material to **examination**" which does not fulfill the above requirement.

Claim Rejections – 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. § 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 20 is rejected under 35 U.S.C. § 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Art Unit: 3761

Claim 20 omits the limitation of originally issued claim 12 calling for the "releasable tab to tab bond" to be between the first tab "outer surface" and the second tab "inner surface." There is not sufficient support in application No. 09/994,191 as originally filed for this limitation.

Claims 20, 21, 27, 33, 41 and 47 are rejected under 35 U.S.C. § 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Claim 20 omits the limitation of originally issued claim 12 calling for the "releasable tab to tab bond" to be between the first tab "outer surface" and the second tab "inner surface." There is not sufficient support in instant specification for this limitation.

Claims 21, 27, 33, 41 and 47 include the limitation "more than 10% elastomeric or extendible under a load of 80 grams force/centimeter or greater." This limitation is not supported by the specification of application No. 09/994,191 or the instant application as originally filed. It is however supported by original claim 20 of the '191 application and claim 17 of the instant application/ Patent No. 6,648,866. It is noted that the '191 specification provides support for 20 grams force/centimeter or greater at page 17, lines 16 and 17.

Claim Rejections – 35 USC § 251

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 251 that form the basis for the rejections under this section made in this Office action:

Whenever any patent is, through error without any deceptive intention, deemed wholly or partly inoperative or invalid, by reason of a defective specification or drawing, or by reason of the patentee claiming more or less than he had a right to claim in the patent, the Director shall, on the surrender of such patent and the payment of the fee required by law, reissue the patent for the invention disclosed in the original patent, and in accordance with a new and amended application, for the unexpired part of the term of the original patent.

Art Unit: 3761

No new matter shall be introduced into the application for reissue.

The Director may issue several reissued patents for distinct and separate parts of the thing patented, upon demand of the applicant, and upon payment of the required fee for a reissue for each of such reissued patents.

The provisions of this title relating to applications for patent shall be applicable to applications for reissue of a patent, except that application for reissue may be made and sworn to by the assignee of the entire interest if the application does not seek to enlarge the scope of the claims of the original patent.

No reissued patent shall be granted enlarging the scope of the claims of the original patent unless applied for within two years from the grant of the original patent.

Claims 1-48 are rejected as being based upon a defective reissue declaration under 35

U.S.C. § 251 as set forth above. See 37 CFR § 1.175.

The nature of the defect(s) in the declaration is set forth in the discussion above in this Office action.

Claims 20 is rejected under 35 U.S.C. § 251 as being based upon new matter added to the patent for which reissue is sought. The added material which is not supported by the prior patent is as follows:

Claim 20 omits the limitation of originally issued claim 12 calling for the "releasable tab to tab bond" to be between the first tab "outer surface" and the second tab "inner surface." There is not sufficient support in application No. 09/994,191 as originally filed, or issued Patent No. 6,648,866 for this limitation.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Bogart whose telephone number is (571) 272-4933.
